

# PRESSURE TEST CARTS

- Versatile Power
- Totally Portable
- Easy Access to Components
- Space Saving

Portable Pressure Test Carts are a convenient way to provide pressure at almost any location where city water and compressed air is available. All of the components are mounted and plumbed in a powder-coated, 2-wheel cart with a sloped front control box containing the valves and gauges. Designs for pressures up to 30,000 psi are available and there is an 8 gallon optional reservoir that can be added if desired.

PORTABLE TEST CART  
FOR WATER SERVICE UP TO 25,000 PSI
