

## TEST PACKS

- Rugged and Durable
- Economical Pricing
- Trouble Free
- Portable and Lightweight

Test packs are lightweight, compact and economical systems for generating liquid pressures, oil or water, up to 30,000 PSI. There are a variety of pressure ranges and flow rates to meet a wide range of requirements. These systems are self contained with all the components built into an open frame stainless steel rack. The controls and gauges are panel mounted in a top plate for easy use and accessibility.
